SUMMARY

Results-driven Full Stack Software Engineer specializing in React.js, Next.js, and TypeScript. Skilled in building scalable, high-performance web applications, with expertise in state management, component-driven architecture, and responsive UI development. Strong understanding of the software development lifecycle (SDLC) and Agile methodologies. Experienced in leading teams, optimizing workflows, and mentoring junior developers.

SKILLS

- | | | | |
|----------------|------------------|------------------|---------------------|
| • Nextjs | • Tanstack query | • Python | • Figma |
| • Reactjs | • Firebase | • Django | • Styled components |
| • Typescript | • Redux | • Rest framework | • HTML |
| • Javascript | • Zustand | • Strapi | • CSS |
| • Tailwind CSS | • React hooks | • Shadcn UI | • Agile methodology |

PROJECTS

Software Engineer at Ribos Technologies

Dec 2024 – Present

- Built and maintained Next.js applications with a focus on performance and responsive UI.
- Integrated REST APIs and optimized state management using Redux and Context api.
- Conducted code verification/reviews and mentored junior developers.
- Managed client meetings, sprint planning, and task allocation under Agile methodology.
- Contributed to frontend architecture and implemented scalable UI solutions.
- Interviewed candidates for developer roles and managed internship students, providing guidance and training.

PROJECTS

Remitbae (Payment platform)

Frontend Developer

- Contributed to the frontend development of a money exchange and payment platform using React.js and Tailwind CSS for a responsive and user-friendly interface.
- Developed modules for wallet management, enabling users to deposit, withdraw, and transfer funds securely.
- Implemented payment gateway integrations (such as Razorpay and Stripe) with smooth transaction handling and error feedback.
- Collaborated with backend developers to connect RESTful APIs for transaction history, KYC verification, and account management.
- Focused on data security, validation, and performance optimization to ensure reliable financial operations.
- Worked closely with designers and the product team to translate business requirements into effective technical features.

Edyuz (School Management Platform)

Frontend Developer

- Developed a comprehensive School Management Platform using Next.js with a modular and scalable architecture.
- Built interfaces for managing teachers, staff, students, and classes, ensuring smooth CRUD operations and data synchronization.
- Implemented timetable management for dynamic scheduling of classes, subjects, and teachers with real-time updates.
- Integrated state management using Zustand to handle complex UI states efficiently across multiple modules.
- Created modules for leave management, enabling staff and students to apply, approve, and track leaves digitally.
- Designed and developed syllabus management features for structured academic planning and tracking of subject progress.

Youngsta (eCommerce) – Freelance

Frontend Developer

- Engineered the frontend of Youngsta, an eCommerce platform for seamless product browsing and purchasing.
- Integrated Stripe for secure payments and handled user authentication.
- Added metadata and SEO tags for every product to boost visibility.
- Built advanced product filters (by category, size, price, etc.) for a smoother shopping experience.

Spinvic (Sports Management Platform)

Frontend Developer

- Contributed to the development of an all-in-one Sports Management Platform connecting local and college turfs, academies, and players.
- Built features for turf booking and scheduling, allowing users to discover and reserve nearby grounds in real time.
- Developed academy management modules to connect children with professional training programs and track their progress.
- Integrated player development workflows, helping young athletes transition from beginners to competitive champions.
- Created dashboards for admins, coaches, and players to monitor bookings, performance metrics, and event participation.
- Implemented campaign and event management features for organizing tournaments, tryouts, and promotional sports activities.
- Collaborated with Spinvic Academies integration to manage enrollments, sessions, and performance tracking.
- Developed a responsive and interactive UI using Next.js and modern component libraries for seamless user experience across devices.

EDUCATION

MERN Stack Developer Intern

Luminar Technolab, Kochi

2023– 2024
